

# SURVIVAL

## Manual

What do you need to  
**SURVIVE?**

## IF YOU WERE TRAPPED ON AN ISLAND...

What advice would you want? How to build a shelter? Where to find food? How to make water drinkable? Here's your chance to help out the boys in Lord of the Flies!

Complete this assignment like your life depends on it! Imagine you're trapped on the Island with the rest of the Lord of the Flies boys. You had the common sense to pack a notebook and pen in your knapsack and, by luck or divine intervention, it, like you, survived the crash. Your job is to create a **Survival Manual** with the boys on the island. It will serve as a reference for you while you maneuver the difficulties of "savage" life. The U.S. Army has a survival manual, and you can look at it for inspiration! You could write a page on how to properly build a big fire (with lots of smoke), or do a page on different kinds of creepers (plants and vines) found on the island. You could even write recipes for pig! There are lots of components to survival, so get creative.

### Assignment Specifications:

- have at least three (3) references from the book and cite them properly in footnotes.
- have neat illustrations to accompany your text.
- should be two (2) pages; each page can be a different topic, however, or even more-- just make sure to fill the pages.
- text should be TYPED in a legible font, size 11.

Feel free to take on a persona for your pages (what would Jack's survival page look like, for example, versus Piggy's?) Have fun, and good luck!

### This is a voluntary leap.

Perhaps if Piggy had read our manual, a similar fall would not have killed him. :( Poor Piggy.
